Endo Access Burs

5 PACK (image not to scale)

- SS WHITE ENDO ACCESS BURS
- Ideal for procedures that require a plunge cut for endodontic access
- Innovative technology with unparalleled neck strength

- If Endo access is through a PFM crown, penetrate the porcelain with a round diamond, then switch to a Great White® round bur to access the metal coping material.

\$37.50

55031

Bur Carbide Endo Access GW2R Round Pack 5

Bur Carbide Crown Remover

5 PACK (image not to scale)

- Great White® burs have a unique design with increased dentates and incorporating enhanced blade geometry, ensures smoother, faster cutting than straight sided burs. They will not catch, grab or stall.

- Use one Great White® to remove 2-3 crowns - easy crown removal, saving time and increasing productivity.
- Faster cutting instrument for amalgam, composite, and PFM crowns

Reflective Shields Plus®

RESIN (images not to scale)

Available in:

ADULT

SMALL

Reflective Shields Plus are exceptionally popular with both dentists and patients. They are uniquely crafted to provide absorption and superior illumination during common procedures. The heart-shape design and distinctive reflective film and are both innovative and practical.

- Does not swell or compromise the work area
- Greater absorbency providing a dry field within seconds
- Added comfort. Special heart shape easily accommodates buccal curvatures and keeps shield in check with the parotid gland
- Unique reflective film allows illumination of the oral cavity
- Durable non-woven absorbent material for moisture retention
- Ideal for various procedures such as sealants, composite fillings, restorations and crown preps

LEDERMIX

LEDERMIX™

A Long History as the Leading Clinically Proven Solution.

DON'T LET THEIR PAIN BECOME YOUR PAIN

LEDERMIX™ Paste

The preparation which has been used and well known for over 40 years, LEDERMIX™ Paste.

- Deep carious lesions, and symptoms of acute irreversible pulpitis.
- Infected pulp, necrosis of the pulp.
- Medicinal temporary filling in the scope of root canal treatment.
- Pain after preparation measures.

\$185.00

007698

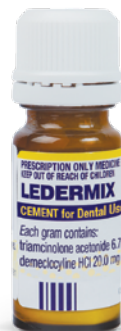

LEDERMIX Paste 5g

EXPIRY DATE: 01/27

LEDERMIX™ Cement And Hardener

Both zinc oxide and eugenol have well known and therapeutic effects on the pulp. Eugenol can be both anti-inflammatory and anti-microbial, depending on the concentration reaching the dentine and pulp.

- **Effective relief:** Triamcinolone in LEDERMIX™ Cement diffuses to the pulp, resolving reversible pulpitis in up to 97.6% of cases.
- **Healing support:** Calcium hydroxide promotes pulp healing and reparative dentine formation.
- **Versatile use:** Suitable as a sedative dressing/lining under restorations, for interim crown cementation, and managing cracked teeth with reversible pulpitis.
- **Primary teeth application:** Can be used as a root filling material after canal preparation.

CALMIX®

Root Canal and Vital Pulp Therapy.

CLINICALLY PROVEN ROOT CANAL TREATMENTS

Therapeutic Benefits

- Maintains higher pH > Deeper penetration and disinfection in dentinal tubules.
- Zirconium Dioxide provides a non-staining radiopaque effect > Lights up on cone beam applications.
- Predictably cleans and disinfects root canals.
- Operators can see the $\text{Ca}(\text{OH})_2$ apexification effect in open apex cases.

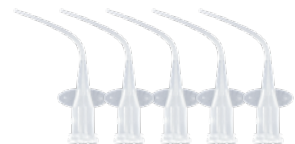

Handling Properties

- Water free and no methyl cellulose > Will not dry out and has a longer shelf life.
- Optimised viscosity for delivery in narrow gauge tips > Gets into apical dentinal tubules, curved canals and lateral fins which are narrower and finer.
- Water miscible > Easy to remove.

\$39.00

006201

**CALMIX® Calcium Hydroxide
Refill Single Syringe**

(1 x 1.5mL Syringe + 5 x Capillary Tips)

ABSORBABLE SUTURES

Resorba Suture Properties

- Short Term Absorbable Monofilament
 - *Tensile strength reduces to 30% after 7 days
- Monofilament allows smooth tissue passage with no wicking of thread
- Reduced tissue trauma
- Perfect knot security
- Available in multiple thread/Needle combinations

GLYCOLON® is available undyed, especially suitable for skin closure, and in violet (coloured with the physiologically harmless D+C No. 2 dye).

coreflon
PTFE SURGICAL SUTURE

Cooreflon dPTFE Suture Properties

- Coreflon dPTFE is the first PTFE suture without micropores
- Reduces dental plaque adhesion and buildup of bacteria
- Superior wound healing
- Thread is slightly flexible for excellent tissue adaption during the healing process
- Soft thread is easy to tie and more comfortable for the patient
- Black needle reduces glare and offers excellent visibility under soft tissue
- 35 cm length allows you to finish many cases eg lateral approach sinus lift with one suture

Black needle offers excellent visibility for suturing under loupe illumination

Important Recommended Surgical Knotting Technique

Alternating Sequencing 3-2-2

Despite unique properties of Coreflon PTFE sutures, standard surgical sewing technique may be applied. However, for knot's maximum durability, sewing technique in **alternating sequence 3-2-2** is recommended.

ALL H & K
STERI-FILE PACKS

**Ready-to-use,
single-use sterile
files for safer, faster
root canal procedures.**

Save Time

- Available in Hedstrom and K files (21mm, 25mm & 31mm)
- Packed in easy-to-open blister 6 pack

- Eliminates pre-treatment sterilisation
- Keeps files sterile until use for greater efficiency

Single Use

- Thorough disinfection of handfiles is difficult and time-consuming
- Single use is recommended for safety
- Reduces risk of cross-contamination

- Minimizes handling by nursing staff
- Lowers chance of needlestick injuries
- Provides peace of mind during every procedure

Endo Files H

6 PACK (image not to scale)

This instrument is directly grinded. High cutting efficiency, use in filing action. Packs of 6.
